Forecast for Sunday 23 Jun 2024

Weather: Low cloud and extensive hill fog through the early hours, the cloud thick enough for a little patchy light drizzle for a time, mainly over western facing slopes. Cloud then lifting and breaking through the morning with warm sunny spells then developing into the afternoon. Winds remaining light throughout.

Chance of cloud-free hill tops above 600m: 20% at first, mainly in the east. Becoming 100% by early afternoon.

Low cloud and visibility: Extensive low cloud at first with bases 100-200ft shrouding tops, especially in the west, bringing very poor visibility and challenging navigation. Cloud lifting and breaking through the morning, clearing the summits by late morning. Good or excellent visibility then follows for the rest of the day.

Meteorologist's View

Navigation will be very difficult through the early hours due to extensive low cloud and hill fog, especially over southern and western slopes. Only very experienced navigators should attempt it. However, conditions will improve from just after sunrise with most summits clear by mid-morning.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Fri 21 Jun 2024	0mm	0mm	0mm

Forecast for Monday 24 Jun 2024

Weather: A dry day with light winds and plenty of very warm sunny spells.

Maximum wind: 10, locally 20 mph from the south.

Chance of cloud-free hill tops above 600m: 80% at first, becoming 100% by mid-morning.

Low cloud and visibility: Isolated clouds covering the highest peaks at first, but these quickly clearing. Visibility generally good or excellent, but locally poor at first.

Temperature: **Valleys:** 10 increasing 22 C
At 600m: 13 increasing 16 C
Freezing level: Above the summits.
